

Angel Paunchev

Software engineer from Sofia, Bulgaria
apaunchev@gmail.com • paunchev.com

I develop software for the web platform. With knowledge across the stack and experience in cross-functional collaboration, I help teams provide robust solutions to real customer problems.

Specialties: JavaScript, CSS, front-end architecture, performance, user experience, accessibility.

Employment

eBag

Jun 2020–present

Lead Front-end Engineer

Jun 2020–present

Responsible for a team of front-end developers. In charge of the front-end architecture and implementation of internal and external site functionality (ebag.bg).

Highlights:

- Implemented code quality initiatives such as unit testing, code documentation, automated code formatting
- Improved site performance by setting a performance budget, reducing external dependencies, optimizing assets, removing unused code
- Resolved recurring bugs, ensuring 99% crash-free sessions
- Created internal content management tools, automating what was previously manual work for multiple teams
- Refactored business-critical functionalities for increased speed and reliability

SpotMe, via Questers

Aug 2015–Apr 2020

Team Lead

Jun 2016–Apr 2020

Responsible for a team of software developers, initially focused on delivering customized features for clients, later transitioned to internal product development. Participated in feature design and development, executed releases and provided technical support. Implemented agile practices and coached team members.
